

HRMS

HRMS (Human Resource Management System) software is a comprehensive tool that automates and streamlines HR processes, including performance management, payroll management, and employee self-service, helping organizations efficiently manage their workforce and improve overall productivity.

Personnel Management

- Maintain detailed employee records including name, contact, department, designation, and ID numbers.
- Upload and manage employee documents like resumes, IDs, certifications, etc.
- Maintain employee basic details, personal details and bank details for easy payroll operations.
- Maintain employee status (Active, Probation, Resigned, Under notice period, etc)

Time and Attendance Management

- Integrates with biometric, RFID, or mobile punch-in systems.
- Captures check-in/check-out times with real-time data sync.
- Bulk attendance insertion through predefined excel template.
- Define and assign multiple shifts and rosters.
- Supports rotating shifts and flexible work hours.
- Track and categorize various leave types (sick, casual, paid, etc.).
- Automated leave balance calculations and approvals.

Overtime Calculation

- Auto-calculates extra hours based on shift schedules.

Shift Scheduling & Planning

- Create custom shifts based on department, role, or location.
- Supports fixed, rotational, split, and night shifts.
- Easily assign shifts to individuals or teams.
- Bulk assignment options for faster scheduling.
- Dashboards for managers and employees to view assigned shifts.
- Mobile-friendly interface for on-the-go access.

Leave Management

- Configure different leave types (e.g., annual, sick, casual, maternity).
- Define rules for accrual, carry-forward, and encashment.
- Employees can apply for leave through the self-service portal.
- Attach supporting documents directly with the application.
- Customizable approval hierarchies based on department or role.
- Notifications and alerts for pending approvals.
- Automatic leave balance updates after approvals.
- Visible to both employees and managers for transparency.
- Leave calculations consider public holidays and weekly offs.
- Prevents leave overlap with designated holidays.
- Generate detailed leave reports by type, department, or employee.
- Insights into absenteeism trends and leave usage.

Automated Notifications

- Instant notifications for attendance, leave approvals, shift changes.
- Keeps employees up to date on personal and organizational activities.
- Set alerts for birthdays, work anniversaries, contract renewals, policy updates, and more.
- Auto-reminders for pending approvals
- related to leave, shifts, or expense claims.
- Helps managers act promptly and avoid bottlenecks.

Security and Access Control

Role-Based Access Control (RBAC)

- Define user roles (e.g., HR, manager, employee) with specific access rights.
- Ensure users see only the information relevant to their role.
- All sensitive data is encrypted both in transit and at rest.
- Protects employee information like salary, bank details, and personal records.
- Automatically revoke access for resigned employees or expired contracts.
- Prevents unauthorized system usage.

Employee Self-Service (ESS) Portal

- Employees can view and update their contact details, addresses, and documents.
- Ensures data accuracy with built-in approval workflows.
- Apply for leave, view leave balances, and check attendance records.
- Track leave approval status in real-time.
- View assigned shifts and upcoming schedules.
- Submit expenses and upload receipts directly through the portal.
- Monitor claim status and approval history.
- Fully responsive design accessible on mobile, tablet, or desktop.
- Manage HR tasks anytime, anywhere.

Reporting and Analytics

- Create reports on attendance, leave, recruitment, and more.
- Filter by department, date range, employee type, and other parameters.
- Visualize key HR metrics through charts and graphs.
- Role-specific dashboards for HR, managers, and executives.
- Export reports in PDF, Excel, or CSV formats.

Payroll Management System

- Individual salary structure configuration
- Employee-specific salary components (basic, HRA, allowances, etc.)
- Employee-specific deduction components
- Statutory component enrollment and configuration:
 - Tax deduction settings.
 - Provident Fund enrollment and contribution rates.
 - Insurance scheme participation.
 - Professional tax configuration.
- Attendance correction workflows.
- Overtime recording.
- Attendance-based salary computation.
- Component-wise manual adjustments.
- One-time additions/deductions.
- Admin override with audit trail.
- Payslip Generation.
- Reporting System.

Difference Between Other HRMS and Isarva HRMS

Other HRMS

v/s

Isarva HRMS

Have to pay based on users	User Licence	Unlimited users per company with minimal cost
Each modules have different licence based pricing	Modules	All in comprehensive solution at affordable price
Limited unless you pay for it	Customization	Fully customizable based on requirement
